CBTF Document Camera Guidelines

Step 1:

Place your scratch paper where it says “Scan Scratch Paper Here”.

Step 2:

Open the camera app in PrairieLearn.

Step 3:

If the picture is not clear, notify a proctor.

Step 4:

Capture and save your image

SCAN SCRATCH PAPER HERE

Ask proctors for help adjusting cameras.

Cameras are positioned to provide the correct orientation and image quality. Moving the cameras may result in an image that is unreadable.

CBTF Document Camera Guidelines

Scan to try the camera interface

Tips

1. Don’t move the cameras. They are positioned to orient your picture correctly.
2. Ask proctors for help if the picture is blurry. If you can’t read it, neither can your professor.
3. Put your work on a clean area of your scratch paper. Ask for a new piece if you need one.
4. Cropping can reduce the resolution of the image.
